First Batch of Apeldoorn Campus Wittenborg Graduates

Recently, Wittenborg University awarded the first "Apeldoorn Campus" group of graduates their **International Business Administration** Bachelor degree, in an international ceremony held at the Business School in Apeldoorn. These students completed the Bachelor degree in International Business Administration, with one graduate from Nepal also having completed the Postgraduate **IBA programme**. The Bachelor graduates, from Thailand, Vietnam, China, Nepal, and the Ukraine enjoyed a formal ceremony attended by friends and relations, with a chance to reflect and socialize at the reception afterwards, on their achievements in the tough, English-taught IBA programme. A number of the graduates are planning to remain in the Netherlands and have found employment within international companies under the skilled migrant employee regulation; however the majority of students will leave the Netherlands to continue their careers abroad.

Pictured left, Roobeah Songsiri (23) from Thailand, who specialized in Economics and Management student, came to the Netherlands for her business studies on a full scholarship from the Thai government and will return to her home country to work for the Siam Commercial Bank in Bangkok, taking with her fond memories of her 4 years in Holland. Graduate Khoi Tran (24) from Vietnam, specialized in Hospitality and Tourism, will leave the Netherlands for an internship in New Zealand at the Marriot Hotel Chain, before continuing his Master studies at the University in Melbourne, Australia. Both students started their studies at Wittenborg University in Deventer in 2007, moving their studies to the new Business School campus in Apeldoorn (Netherlands) in 2010. Wittenborg Does Well in National Student Survey

Results from the National Student Survey 2011 (Nationale Studentenenquête 2011) show that students of Wittenborg University Business School in Apeldoorn are satisfied with the education they get, their school itself, and the city in which they study. Looking at the mean national results, Wittenborg Business School scored above-average in 12 out of 15 categories, and managed to reach a **7.0** average (national average = 6.8). Although this is a good result, Wittenborg Business School strives to heighten this mark to a 7.5 next year. Specific points in which Wittenborg excels are the suitability of classrooms, the information on rules, procedures and outcomes of educational evaluations, and the availability of workspace.

Other categories in which Wittenborg scored above-average are: the connection between the programmes of Wittenborg Business School and programmes on secondary school level, the level of contact between students and industry, the quality level of work placement guidance, class schedules, and the way in which Wittenborg deals with complaints and problems. Wittenborg University students also value the availability and affordability of living space in Apeldoorn. This positive judgement might be the result of the joint commitment of Wittenborg and the local Apeldoorn government for student housing and the related housing services. Wittenborg Brings New Student Housing to Apeldoorn

In the coming academic year, a new form of student housing will be brought to Apeldoorn by Wittenborg Business School: the so-called 'Spaceboxes'. 24 of these compact housing units of 3 by 6 meters, including a kitchenette, bathroom with shower, and living area, will be placed in the Molendwarsstraat in Apeldoorn. Currently, most of Wittenborg University's students are housed in apartments and houses throughout the city. In the future, permanent student accommodation will be realized and possibly centralized and located closer to the university itself. Thanks to fruitful collaboration between Wittenborg, housing corporations, and the local government of Apeldoorn regarding the Spaceboxes, readily available housing for the growing number of students arriving from abroad, including the newly enrolled students for the new Master programmes, is ensured.
